

Worksheet 5. Application Summary

This worksheet will be posted on the web to notify the public of requests for critical use exemptions beyond the 2005 phase out for methyl bromide. Therefore, this worksheet cannot be claimed as CBI.

1. Consortium Name: Garden Rose Council representing California's rose growers.

2. Location: Primarily Kern County, California

3. Crop: rose nursery stock

4. Bromide Requested 2007 50,000 lbs.

5. Acres Treated with Methyl Bromide 2007 200 Acres

6. If methyl bromide is requested for additional years, reason for request:

2006	<u>462,916</u>	<u>lbs.</u>	Area Treated	<u>1,538</u>	<u>Acres</u>
2007	<u>50,000</u>	<u>lbs.</u>	Area Treated	<u>200</u>	<u>Acres</u>
2008	<u>50,000</u>	<u>lbs.</u>	Area Treated	<u>200</u>	<u>Acres</u>

Place an "X" in the column(s) labeled "Not Technically Feasible" and/or "Not Economically Feasible" where appropriate. Use the "Reasons" column to describe why the potential alternative is not feasible.

Potential Alternatives	Not Technically Feasible	Not Economically Feasible	Reasons
1,3-dichloropropene	X	X	Doesn't control nematodes and diseases well enough to meet industry standards and certification requirements for commercially clean nursery stock under the conditions in the growing areas. Weeding costs increase and grades decrease.
metam sodium	X	X	Doesn't control nematodes and diseases well enough to meet industry standards and certification requirements for commercially clean nursery stock under the conditions in the growing areas. Weeding costs increase and grades decrease.
1,3-dichloropropene + metam sodium	X	X	Same as above. Combination doesn't improve performance.
chloropicrin	X	X	Not a nematicide nor a herbicide. Not a certification treatment.
